

Changing Post Mix

Changing the post mix is a simple exercise.

The steps below **will** guide you through how to change a box of post mix:

Step 1. Unscrew the connecting pipe to the box.

Step 2. Remove the plastic stopper from the connection **of** the new box of post mix.

Step 3. Attach the connecting pipe to the connection of the new box and screw it in tightly, **you** will hear a 'ticking' noise as the system draws the post mix **syrup into** your line.

Step 4. Go back to the bar and dispense your drinks.
